

CAREER OBJECTIVE

Motivated Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning at KL University. Seeking to leverage strong foundational skills in programming (Python, Java, JavaScript), database management (MySQL), and full-stack web technologies to secure an internship or entry-level engineering position. Passionate about applying AI/ML models, performing data analysis, and building user-centric, scalable web applications to solve complex real-world challenges.

EDUCATION

B.Tech in Computer Science Engineering (AI & ML)	2024 – Present
KL University	Guntur, India
Specializing in Artificial Intelligence and Machine Learning. Active coursework includes Data Structures and Algorithms, Database Systems, Software Engineering, Machine Learning Pipelines, and Web Development frameworks.	
Intermediate Education (12th Grade)	2022 – 2024
Vignana Bharathi Junior College	Andhra Pradesh, India
Focus in Mathematics, Physics, and Chemistry.	
Secondary Education (10th Grade)	2021 – 2022
Vignana Bharathi High School	Andhra Pradesh, India

EXPERIENCE

Data Science Intern	Apr 2026 – Jun 2026
Siemens	Remote / Hybrid
- Explored data analysis, manipulation, and statistical models utilizing Python ecosystems. - Cleaned and parsed unstructured business datasets to uncover actionable performance indicators. - Designed and evaluated foundational regression and classification models using scikit-learn. - Gained experience in corporate software workflows and industrial application of AI principles.	
Machine Learning Specialist Intern	Feb 2026 – May 2026
Future Interns	Remote
- Created and integrated end-to-end Machine Learning pipelines. - Built and integrated REST APIs to consume machine learning outputs inside client interfaces. - Utilized Git and GitHub for team version control, code merges, and issue tracking. - Participated in regular stand-ups and presented project demos to senior engineers.	

TECHNICAL SKILLS

Programming Languages:
Python, Java, JavaScript (ES6+)

Web Technologies:
HTML5, CSS3, JavaScript, Spring Boot

PROJECTS

Citizen-Politician Interaction Platform
HTML, CSS, JS, SPRING BOOT

A web application bridging the communication gap between citizens and representatives. Built issue reporting, feedback modules, and role-based moderators.

AI & Data Science:

Machine Learning, Data Analysis, Generative AI

Databases & Tools:

MySQL, Git, GitHub, REST APIs, VS Code

Student Extracurricular Management

JAVA, MYSQL, WEB STACK

A tracking portal enabling administrative officers to record and approve students' extracurricular awards and certificate validations.

AI Chatbot (Experimental)

PYTHON, NLP

A personal sandbox application analyzing basic NLP mechanics, sentence structure tokenization, and vector mappings.
